PROFILE

Final year B.Tech Computer Science and Engineering student with strong foundations in programming and a growing focus on OT/ICS security. Particularly interested in securing industrial control and critical infrastructures, and interested to learn areas that combine Electrical, Electronics and Computer.

EDUCATION

B.TECH IN COMPUTER SCIENCE ENGINEERING

KTU University – MEA Engineering College, Malappuram

CGPA : 8.66

2024 – Present

HIGHER SECONDARY AND SECONDARY EDUCATION

Ma'din Public School, Malappuram

- Completed Senior Secondary in Science Stream - March 2023
- Completed Secondary Education - March 2021

INTERNSHIP EXPERIENCE

INTERN

Veermata Jijabai Technological Institute (VJTI) – Mumbai, Maharashtra

Jun 2026 – PRESENT

- Working as an intern on OT Security under Dr. Faruk Kazi and Dr. Parul Sindhvad at the Department of Electrical and Engineering.
- Got familiarized with industry used PLCs from Schneider and ABB.

RESEARCH INTERN

National Institute of Technology Calicut – Kozhikode, Kerala

May 2025 – Jul 2025

- Worked on a research-oriented internship project under Dr. Saidalavi Kalady at the Department of Computer Science and Engineering
- Focused on AI Agents with specialization in Gaze-Augmented Imitation Learning for self-navigating drones.

PROJECTS

MODBUS DISSECTION

- Used tools like Wireshark, ModScan, ModSim.
- This project helped me to learn in more depth about the MODBUS Protocol.

FACE TRACKER (OPENCV + ARDUINO)

- Built a real-time face-tracking system using OpenCV and Arduino, integrating software, sensors, and servo.

- Strengthened skills in Arduino programming.

SIGNATURE BASED INTRUSION DETECTION SYSTEM

- Familiarized with tools such as Snort, Suricata and gained knowledge about types of IDSs.
- Made a simple web UI using Python Flask to demonstrate the results.

HOUSE PRICE PREDICTION (MELBOURNE DATASET)

- Applied Random Forest Regression, categorical variable imputation, and feature engineering to analyze real estate pricing trends.
- Worked on handling missing data, data preprocessing, and model evaluation for better accuracy.

STUDENT GRADE PREDICTION MODEL

- Built a linear regression model to predict student grades based on various academic and socio-economic factors.
- Explored feature importance and correlation analysis to interpret key influencing variables.

MNIST DIGIT RECOGNITION

- Implemented digit classification on the MNIST dataset using Logistic Regression and Random Forest.

FACE DETECTION SYSTEM

- Created a face-detection app using React and Clarifai API, with user authentication and image link submission

LIBRARY MANAGEMENT SYSTEM

- Built a full-stack web application using React, Node.js, and PostgreSQL for managing books and students.

AWARDS & ACHIEVEMENTS

- Selected for central government's Inspire Award Program - 2020-21
- School Topper for Physics in Board Exam - 2022-23
- Won first prize in idea pitching conducted by IEEE MEA - 2023-24
- Won first prize in idea pitching conducted by IEDC MEA - 2023 - 24
- Won with 2nd price in a hackathon organised by TACS MEA - 2024-25
- Reached the finals of IEEE Eurekha conducted by Pune section - 2024-25
- Selected for internship at NIT Calicut on topic AI Agents - 2024-25
- Won second prize in debugging competition conducted by TACS MEA - 2025-26
- Selected for internship at VJTI Mumbai on topic OT Security - 2025-26

CERTIFICATIONS

- OT/ICS From Packet to Floor - ZeroNteK
- OT/ICS Foundation - Udemy
- OT/ICS Advanced training - XploitAcademy
- Basics of Networking - Cisco NetCad Academy
- Full Stack Web Development – From Zero To Mastery
- Intro to Machine Learning – Kaggle

ACTIVITIES & INTERESTS

I enjoy creating electronics and coding projects, especially those that connect computer science engineering with real world devices.
